►► Serving you better... on the road!

We are pleased to announce that a fourth training advisor has joined our team. Based in Saskatoon, Ms. Shelley Heintz will be on hand to install and support Optosys[®]2 in the Western provinces.

Her arrival should help us keep up with the increasing demand for Optosys[®]2 installations. ☺

Internet high speed

Business High-Speed Service from Bell has been available to OSI members for the past few months. During this time many of you have experienced difficulties obtaining information and explanations on this package deal.

We were able to rectify this situation, and Bell has implemented new procedures to better serve you. In view of the misunderstanding, the Business High-Speed Service promotion has been extended to May 31, 2005. Don't hesitate to contact Bell to take advantage of this offer.

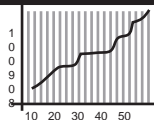

We apologize for any inconvenience this may have caused.

Refer to this month's mailing for more information on this promotion.

OPTOSYS² Installations

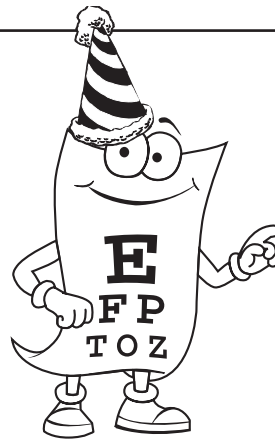

February 2005

Clinique d'Optométrie Bélanger Inc.
Montréal, QC

Centre d'Optométrie
Desjardins, Nadeau, O.D.
Acton Vale, QC

Serge Ferland O.D.
Victoriaville, QC

OPTOSYS².com IS 1 YEAR OLD!

After months of rehearsal, Optosys[®]2 made its clinic debut on March 1st! As the supporting actors anxiously looked on ... the question they all asked was: "Will this young newcomer be able to handle the lead role?"

One year later, the supporting actors are unanimous: In addition to making clinic management easier, Optosys[®]2 delighted them with its stellar performance and special effects.

We would like to thank all of the supporting actors who not only assisted, and continue to assist us, in developing and perfecting Optosys[®]2, but who also helped Optosys[®]2 on its path to stardom!

Requests for demos are arriving from across Canada and appointments are being snapped up quickly. Places are limited for 2005. Don't wait! Request your dates right away!

The leading optometric practice management system ...

Now connected to the world!

Medsys[®]

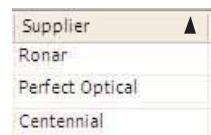

This Optosys[®] module allows you to electronically send your claims to your provincial government. It is available in the following provinces:

- BC : - Internet (Web-based Teleplan) and Modem (SPANDial)
* Reminder: Support for the DOS version of Teleplan ceased to be available on March 1, 2005.
- AB : Modem (H-Link) and Internet (Wellnet)
- SK : Modem
- MB : Modem transmission (SimPC)
- ON : Modem (EDT) and Diskette
- QC : Internet (TIP-I) and Diskette
- NS : Internet (MSLeLink)

Contact Ms. Mirella Di Spirito to schedule an installation or an update of your Medsys[®] module.

Discover OPTOSYS².com : Grids

Optosys[®]2 is enhanced with a feature that allows you to sort the grids that are found throughout the software. Sort the grid in ascending or descending order by simply clicking on a column header.

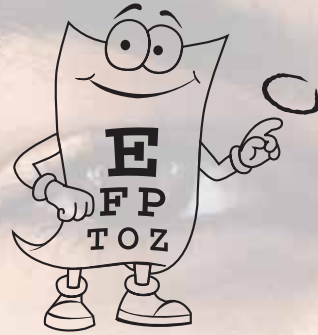

It is also possible to export a grid's contents to CSV, Excel, HTML or XML format with a simple right click of the mouse. This feature is practical for managing data or sharing it with other programs.

Simplify ... ask us how!
