

## [HOW TO PLUG IN YOUR EQUIPMENT INTO A UPS 750 BACKUP BATTERY.]

The only equipments that should be plugged in the Battery Backup side are the computer, the monitor, the router and / or switch. This will prevent damages to your equipment that can be caused by power failures.

The rest of your equipment should be plugged in the Surge Protection side. This side protects against power surges.

If you have any questions, please contact OSI's Technical Services:  
 514-762-1954 or 1-866-660-6797

# HOW TO ADD AN INSURER TO A PATIENT FILE.

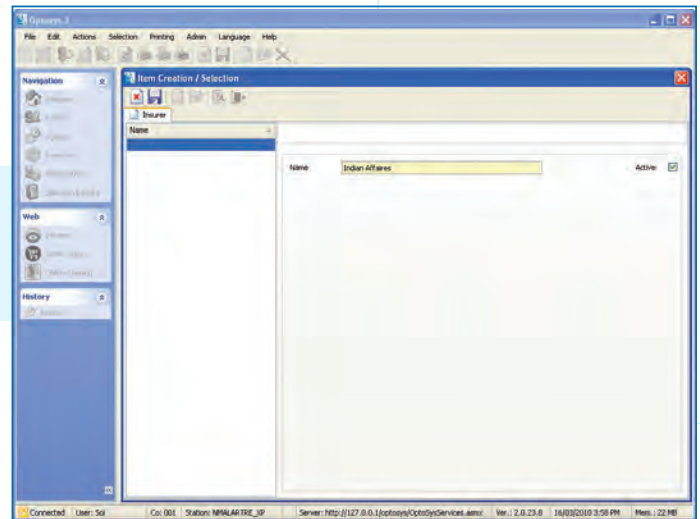

In modification mode click on the down arrow to activate the drop down menu beside the Insurer Field.

If the desired Insurer is not in the list, click on the "+" button.

The item creation window for Insurers will appear. Enter the name of the insurer that you wish to add, then save.

The Name of the Insurer has now been added to the Patient File, you can now add their plan number. Save the modifications you just made to the patient's file.
