

[TIPS & TRICKS]

Verifying scheduled backup tasks

Optosys®2 allows you to verify that your scheduled backup tasks were completed successfully before you take a copy of them.

- [1.] In the top menu click on “Help” and select “View Log of Backup Tasks...” This function is available from any Optosys®2 client.

- [2.] This window will allow you to view all of the current backup tasks from your server. From this window, you can view the name of the task, its start and end time, the duration and if the task was completed successfully (green) or not (red).

A screenshot of a window titled 'Backup Tasks Report'. The window contains a table with the following data:

Task name	Start time	End time	Duration	Success
Backup database	27/10/2008 11:10 AM	27/10/2008 11:10 AM	28 sec	<input checked="" type="checkbox"/>
Backup database	20/10/2008 11:10 AM	20/10/2008 11:11 AM	56 sec	<input checked="" type="checkbox"/>
